

ADAM ROBINSON

Software Engineer

SUMMARY

Creative, detail-oriented software engineer with a deep interest in reverse engineering. Proven track record of creating and implementing successful front and back-end web applications and looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Ground Coffee Co (Full-stack Web App) – Cashiers can take coffee orders from customers with their names. Baristas can log in to the app, see orders made, and mark them as complete. Orders that have been completed will note which barista completed the order.

Study Better Notes (Full-stack Web App) – Users can log in to their profile and find their list of notes. They can add new notes through an input, which they can then edit or delete all notes in their profile.

Accelerated Results Fitness Tracker - (Full-stack Web App) – Accelerated Results Fitness Tracker – Users can log in, see their workout with multiple videos, record their activity, and add notes if needed

Other Projects: Cincinnati Star Gazers APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, Sunset Styles website built for a salon that is an on-trend full-service salon, Inertia Wealth Management website made for a financial planning group.
