

ADAM ROBINSON

Software Engineer Student

SUMMARY

Creative, detail-oriented software engineer with a deep interest in creating and implementing successful front and back-end web applications and looking to bring my skills to a tech company with global reach.

EDUCATION

Software Engineer Student at 100devs

January 2022 — Present, anticipated completion date September 2022

- A 30-week boot camp that teaches you to the fundamentals of HTML, CSS, JavaScript, React, Node, Express, MongoDB, and some CS Theory, to enable students to build full-stack web apps.
- Collaborate with other students to build modern and responsive web applications using best practices
- Primarily a self-directed learning program, including not only course work, but also outside projects, daily codewars, and helping other students problem solve via discord help channels

Recent Projects:

Cincinnati Star Gazers – A picture of the day web app with NASA API Integration, built with HTML, CSS, and JavaScript.

Sunset Styles – A fully responsive website for an on-trend full-service salon. Built with HTML, CSS, and JavaScript

Task Tracker (Full-stack Web App) – A task-tracker/to-do list built with HTML, CSS, JavaScript, MongoDB, Express, and Node.

Current Projects (on-going):

Inertia Wealth Management (Full-stack Web App) – A fully responsive website for a financial planning group offering planning and education for individuals and employers. Built with HTML, CSS, JavaScript, MongoDB, Express, React, and Node.

Accelerated Results Fitness Tracker - (Full-stack Web App) – Accelerated Results Fitness Tracker – Users can log in, see their workout with multiple videos, record their activity, and add notes if needed.

Recipe Tracker - (Full-stack Web App) – Users can log in, and add, edit, or delete recipes. Users can also search through categories of recipes and add ingredients from recipes to a grocery list.
